SUBJECT INDEX, VOLUME 70

A

ACTH, epinephrine-induced release of, in normal human subjects, 525
release, in adrenalectomized rats, following electrical stimulation, 263
releasing activity of bovine posterior pituitaries, 62
Adrenal, gland, whole body x-irradiation, nitrogen secretion and the, 589
homogenates, production of ultraviolet-absorbing lipids by, 322
steroid synthesis, effect of ascorbic acid on, 267
Adrenalectomy, effect of, on erythropoietic response to sheep erythropoietin and cobalt, 243
influence of, on metabolic actions of glucagon, in fasted rat, 54
Adrenocortex, pituitary action on, 390
Adrenocorticoids, influence of, and tryptophan pyrrolase induction, 84
Adrenocorticotropin, presence in hog hypothalamus of, 471
Aldosterone, effect of growth hormone on the biosynthesis of, in the rat, 486
secretion, effects of brain stem lesions on, 556
effect of temporary thoracic caval constriction on, 822
Alpha aminoisobutyric acid-C^{14}, uptake in thyroid slices by thyrotropin, 937
Amino acid transport, hormonal specificity of action of growth hormone on, 381
Amino acids, halogenated aromatic, transamination and deamination of, 750
Amylolytic activity, elevation of, in the parotid glands of hypophysectomized rats by hormonal replacement therapy, 902
Androgens, regulation of nucleic acid synthesis by, 99
Androstane series, comparison of biological characteristics of Δ^1- and Δ^4-3-ketosteroids of, 149
Anesthesia, sodium hexobarbital, effect on adrenal 17-hydroxycorticosteroid secretion rate, 71
sodium pentobarbital, effect on adrenal 17-hydroxycorticoid steroid secretion rate, 71
Antisera, TSH, failure of, to neutralize long-acting thyroid stimulator, 801
Antithyroid drugs, role of, in development of goiter, 314
Ascorbic acid, effect on adrenal steroid synthesis *in vitro*, 267
ATP concentration, and the effect of thyroxine on oxygen consumption rate of liver homogenate, 68
Autotransplants, effect of uterine, on estrous cycle, 442

B

β-Corticotropin releasing factor, presence in the hog hypothalamus of, 471
β-Glucuronidase, a comparison of the effects of hormones upon, 606
from preputial glands of female rat, hydrolysis of steroid glucuronides with, 189
Blood calcium, lowering of, by Calcitonin, 638
Blood pressure, effect of cortisone acetate on, 806
Bone, ectopic, effect of cortisone on development of, 437
in vitro, metabolism of glycine-1-C^{14} by, 890
Bone maturation, in infant mice, dehydroepiandrosterone and testosterone, relative activities of, 131

C

C^{14}-diethylstilbesterol, metabolism of, in

the chicken: retention and excretion, 880
conversion *in vivo*, 886
C^{14}-labeled steroid, uptake and subcellular distribution of in ventral prostate, 109
Calcitonin, evidence for, 638
Carbonic anhydrase content of mouse uteri, effects of estrogen on, 359
Cell formation, polyploid, role of thyroid gland in control of, 761
Cells, growth of, effect of human growth hormone on, 31
trophoblastic giant, in placentas, probable role in steroid-hormone production, 407
Chromatography, of dog hypothalamus, 478
Cobalt, effect of adrenalectomy on erythropoietic response to, 243
Constriction, effect of temporary thoracic caval, on aldosterone secretion, 822
Cortisol, secretion, effects of brain stem lesions on, 556
some biologic actions of 16-methylene derivatives of, 633
Cortisone, and the regulation of hepatic gluconeogenesis, 47
effect of, on development of nephrocalcinosis and ectopic bone, 437
Cortisone acetate, effect of, on blood pressure and on the pathology of heart and kidney in uninephrectomized rats, 806

D

d-Aldosterone, effects on excretion of sodium and potassium by adrenalectomized rat, 445
Deamination, of halogenated aromatic amino acids, 750
Dehydroepiandrosterone, activity of in infant mice, 131
sulfate, binding of to serum albumin, 857
Dehydrogenese, succinic, effect of local heat *in vivo* on, in rat testis, 731
Development, fetal, effects of maternal hypothyroidism on, 443
Diet, potassium-deficient, in adult rats, effect of hypophyseal growth hormone on, 223
Dihydrotachysterol, hypercalcemic and hyperphosphatemic actions of, in rats and dogs, 815
Diiodotyrosine: monoiodotyrosine ratio in hyperfunctioning thyroid, of mice, 13

E

18-Hydroxycorticosterone, radioactive, biosynthesis of, from 17α-H^3-progesterone, 386
Electrophoresis, of thyroxine, in protein-free solutions, 679
11-Hydroxyandrostenedione, isolation and identification of, in canine adrenal vein blood, 39
11-Hydroxyprogesterone, isolation and identification of, in canine adrenal vein blood, 39
11-Ketoprogesterone, isolation and identification of, in canine adrenal vein blood, 39
Enantiomers, endocrine studies of the, of a racemic dodecahydro-phenanthrene derivative, 752
Endocrine, influences of, on rat ovarian proteinase activity, 697
Enzyme systems, cytochemistry of oxidative, in the Leydig cells of the testis, 167
oxidative, histochemical localization of, in the human anterior pituitary, 874
Erythropoietin, sheep, effect of adrenalectomy on erythropoietic response to, 243
Estradiol-17β, *in vitro* metabolism of, by human fetal liver, 907
Estriol, formation of, 907

glucosiduronic acid, formation of, 907
Estrogen, effects, on carbonic anhydrase content of mouse uteri, 359
effects of, upon thyroidal I^{131} release and excretion of thyroxine in ovariectomized rats, 673
on the uterine carbonic anhydrase of immature rats, 781
Estrone, formation of, 907
Estrous cycle, effect of uterine autotransplants on, 442
Estrus, persistent, transplantation of ovary to spleen in, 429

F

Fasting, in young rats, adrenal ascorbic acid response to, 18
adrenal corticoid response to, 18
plasma response to, 18
5-Hydroxytryptamine, in hearts of normal, thyroid-fed and propylthiouracil-fed male and female rats, 743
5-Hydroxytryptophan decarboxylase, in hearts of normal, thyroid-fed and propylthiouracil-fed male and female rats, 743
Fluoroborate ions, accumulation of, in thyroid glands, effect of TSH on, 295
Fraction H, porcine, adipokinetic activity of, 233

G

Gamma radiation, effects of, on oxygen utilization, iodine metabolism and leucine incorporation by tissue slices, 328
Gel filtration, of posterior pituitary hormones, 738
Glands, exocrine, effect of propylthiouracil on, 24
parotid, elevation of amylolytic activity in, 902
sex accessory, effect of testosterone and growth hormone on nucleic acid and protein in, 747
submaxillary salivary, experimental analysis of the, in relationship to its nerve-growth factor content, 915
Glucagon, effect of, on the acinar portion of the pancreas, 867
influence of adrenalectomy on the metabolic actions of, in fasted rat, 54
Gluconeogenesis, hepatic, cortisone and the regulation of, 47
Glucose, metabolism, effect of gonadotropic hormones on, by luteinized rat ovaries, 701
oxidation, effect of propylthiouracil and TSH on, in rat thyroid tissue, 481
in vitro stimulation of, in thyroid by serontonin, 656
uptake, factors modifying actions of hormones on, 420
Gluco-6-phosphatase, activities in normal and testosterone-treated rats, 842
Gluco-6-phosphate dehydrogenase activity, in adrenal cortex of sodium-depleted rat, 288
Glycine-1-C^{14}, metabolism of, by bone *in vitro*: effects of hormones and other factors, 890
Glycine-2-C^{14}, effect of testosterone propionate on incorporation of, 175
Glycogen, uterine, in the rat, 600
liver, and blood sugar levels, 595
Goiter, development of, studies on the role of extrapyramidal and rhinencephalon areas in the, 517
high radioiodine uptake, studies on production of, with propylthiouracil, 650
role of iodine, sodium chloride and antithyroid drugs in, 314
Goitrogen, methimazole, no apparent extrathyroidal effects in the rat, 934
Gonad-brain relationship: effects of female sex hormones on electroshock convulsions, 196
Gonadotropin, pituitary, estrogen-induced depletion of, 611

H

Hemorrhage, role of kidney in adrenocortical response to, in hypophysectomized dogs, 182
Histology, ovarian, after x-ray irradiation, in albino rats, 1
Hormone, antihuman growth rabbit serum, further observations on the question of specificity of, 846
bovine pituitary growth, effect of incubation with rat tissues on, 754
growth, action on amino acid transport into rat muscle, 381
effect of, on the biosynthesis of aldosterone in the rat, 486
effect of hypophysectomy and, on the light cells of the thyroid gland, 786
human growth, effect of, on growth of cells, 31
hypophyseal growth, effect in adult rats on potassium-deficient diet, 223
I^{131}-labeled human growth, the fate of in the rabbit, 459
neurohypophysial, participation of, in oviposition in the hen, 453
thyroid-stimulating (TSH), effect of, on accumulation of perchlorate and fluoroborate ions in thyroid glands, 295
effect of, on glucose oxidation in rat thyroid tissue, 481
Hormones, actions on glucose uptake, some factors modifying, 420
comparison of the effects of, upon β-glucuronidase and alkaline phosphatase activities in mammary gland and liver, 606
female sex, effects on electroshock convulsions, 196
gonadal and adrenal cortical, 611
gonadotrophic, effect of, on glucose metabolism by luteinized rat ovaries, 701
melanocyte stimulating, α and β presence in the hog hypothalamus of, 471
neurohypophysial, failure of to influence prolactin secretion *in vitro*, 927
posterior pituitary, gel filtration of, 738
thyroid, observations on the relation between action and degradation of, in tadpoles and frogs, 622
Hyaluronidase, effect of local heat *in vivo* on, in rat testis, 731
Hypophysectomy, effect of, on the light cells of the thyroid gland, 786
Hypophysis, autografts of, inducing delayed nidation, 228
Hypothalamic extract, calf, with adrenocorticotropin-releasing properties, 249
Hypothalamus, of the dog, chromatography and hormonal activities of, 478
effect of electrical stimulation of, on thyroid function, 298
of the hog, presence of β-corticotropin releasing factor, α- and β-melanocyte stimulating hormones, adrenocorticotropin, lysine-vasopressin and oxytocin, 471
Hypothyroidism, maternal, effects on fetal development, 443
Hytakerol (AT-10), hypercalcemic and hyperphosphatemic actions of, 815

I

Incubation, with rat tissues, effect of on bovine pituitary growth hormone, 754
Iodide pools, of the rat thyroid, 660
Iodine, role of, in development of goiter, 314
Iodine metabolism, effects of gamma radiation on, 328
Iodotyrosines, studies on the biosynthesis of: relationship of peroxidase, catalase and cytochrome oxidase, 505
a soluble thyroidal iodide-peroxidase tyrosine-iodinase system, 492
Insulin, in blood, state of, "free" and "bound" insulin-like activity in serum,

estimation of, 95
Involution, postpartum, of the uterus, enzymic activity associated with, 567
Irradiation, x-ray, ovarian function and histology after, in albino rats, 1
Isografting, supplementary heterotopic pituitary, adrenocortical changes after, 837

K

Kidney, role of, in adrenocortical response to hemorrhage in hypophysectomized dogs, 182

L

L-Aldosterone, effects on excretion of sodium and potassium by adrenalectomized rat, 445
L-amino acid oxidase, synthesis of thyroxine by, 931
L-3:5:3-Triiodothyronine, oxidative deamination of, by extract of rat kidney mitochondria, 340
L-Thyroxine, influence of, on the respiration of baker's yeast, 669
Lactation, in rats and mice, adrenal ascorbic acid levels during, 796
Lactogenesis, artificial, biochemical test of, 375
Leucine incorporation, effects of gamma radiation on, 328
Leydig cells of the testis, cytochemistry of oxidative enzyme systems in, 167
Lipids, ultraviolet-absorbing, production of, by adrenal homogenates, 322
Liver glycogen, and blood sugar levels in x-irradiated newborn rats, 595
Lymphoid tissue, effect of dose and time of administration of 19-nortestosterone on differentiation of, in bursa fabricii, 159
Lysine-vasopressin, on the presence in hog hypothalamus of, 471

M

McGintry method, progesterone assay in the rabbit by the local intrauterine response, 940
Mammogenesis, artificial, biochemical test of, 375
Metabolism, C^{14}-diethylstilbesterol, in the chicken, conversion *in vivo*, 886
in vitro, of estradiol-β-17, by human fetal liver, 907
of tissues, from pregnant diabetic rats *in vitro*, 88
strontium and calcium, effects of thyroxine upon, of embryonic bone growth *in vitro*, 774
Methimazole, a goitrogen without apparent extrathyroidal effects in the rat, 934
Methylthiouracil, biochemical estimation of elevated acid phosphatase in anterior pituitaries of rats fed with, 923
Mitochondria, rat kidney, extract of, oxidative deamination of L-3:5:3′ triiodothyronine by, 340
rat liver, thyroxine and the release of protein from, 511
Monoamine oxidase, in hearts of thyroid-fed and propylthiouracil-fed male and female rats, 743

N

Nephrocalcinosis, effect of cortisone on development of, 437
Nidation, delayed, induced by autografts of hypophysis, 228
19-Nortestosterone, effect of dose and time of administration on differentiation of lymphoid tissue in bursa fabricii, 159
Norethandrolone, interaction of with testosterone propionate on the prostate of mature rat, 929
Nucleic acid, effect of testosterone and growth hormone on, 747

synthesis, regulation of, by androgens, 99

O

Ovariectomy, of C mice, adrenocortical changes after supplementary heterotopic isografting in, 837
Ovaries, luteinized rat, effect of gonadotrophic hormones on glucose metabolism by, 701
Ovary, function of, after x-ray irradiation, in albino rats, 1
transplantation to spleen in persistent estrus, 429
Oviposition, role of "bearing down" reflex on, 221
Ovulation, induction of, by direct intrapituitary infusion of median eminence extracts, 350
Oxygen utilization, effects of gamma radiation on, 328
Oxytocin, on the presence in hog hypothalamus of, 471

P

P^{32}, excretion, bio-assay of parathyroid hormone-like activity in plasma using, 711
Pancreas, acinar portion of, effect of glucagon on, 867
Parathyroid extract, effects of a massive dose, on bone metabolic pathways, 546
Parathyroidectomy, survival and serum levels of rats after, 715
total, phosphorous changes in Rana Pipiens, 618
Peptides, metabolic effects of, from the anterior pituitary gland, 579
Perchlorate ions, accumulation of, in thyroid glands, effect of TSH on, 295
Percolation, use of, for extraction of vasopressin, 43
Phenathrene derivative, a racemic dodecahydro-, endocrine studies of, 752
Phosphatases, effect of local heat *in vivo* on, in rat testis, 731
Phosphorus, changes in totally parathyroidectomized Rana Pipiens, 618
Pituitaries, bovine posterior, ACTH-releasing activity of, 62
Pituitary, anterior, function of in male rats deprived of dietary protein, 723
metabolic effects of two peptides from, 579
effect of progesterone on folliculotropic potency of, 303
function, epinephrine-induced release of ACTH in normal human subjects, a test of, 525
gonadotropin content, estrogen-induced depletion of, 611
histochemical localization of oxidative enzyme systems in the human, 874
Potassium excretion, effects of d- and l-aldosterone on, by adrenalectomized rat, 445
Prednisolone, some biologic actions of 16-methylene derivatives of, 633
Pregnancy, in rats and mice, adrenal ascorbic acid levels during, 796
maintenance in ovariectomized rats with 16α,17α-dihdroxyprogesterone derivatives and other progestogens, 283
Progesterone, assay, in the rabbit by the local intrauterine response (McGinty method), 940
effect of, on folliculotropic potency of pituitary, 303
secretion, ovarian, rate of, in the dog, 532
Progestin, effects of, on the uterine carbonic anhydrase of immature rats, 781
Prolactin production, estrogen stimulation of, by rat adenohypophysis *in vitro*, 272
secretion *in vitro*, failure of neuro-

hypophysial hormones to influence, 927
Propylthiouracil, effect of, on chick liver and plasma lipids, 465
on exocrine glands, 24
on glucose oxidation in rat thyroid tissue, 481
in vitro stimulation of thyroidal activity by, 7
studies on production of high radioiodine uptake goiter with, 650
Protein-bound iodine, autoradiographic time study of, in human thyroid gland, 278
Protein, dietary, anterior pituitary function in male rats deprived of, 723
effect of testosterone and growth hormone on, 747
Proteinase activity, endocrine influences on rat ovarian, 697

R

Radioiodine, new procedure for estimating secretion rate of thyroxine with, 142

S

Secretion, aldosterone, effects of brain stem lesions on, 556
cortisol, 556
ovarian progesterone, rate of in the dog, 532
Serotonin, *in vitro* stimulation of glucose oxidation in thyroid by, 656
Serum, albumin, binding of dehydroepiandrosterone sulfate to, 857
calcium, levels of in parathyroidectomized rats, 715
rabbit, antihuman growth hormone, specificity of, 846
17α-H^3-progesterone, biosynthesis of radioactive and 18-hydroxydeoxycorticosterone and 18-hydroxycorticosterone from, 386
16α,17α-Dihydroxyprogesterone derivatives, pregnancy maintenance in ovariectomized rats with, 283
16-Epiestriol, formation of, 907
Sodium, chloride, role of, in development of goiter, 314
excretion, effects of d- and l-aldosterone on, by adrenalectomized rat, 445
Spleen, transplantation of ovary to, in persistent estrus, 429
Steroid glucuronides, hydrolysis of, with β-glucuronidase from preputial glands of female rat, 189
Steroid-hormone production, probable role of trophoblastic giant cells in placentas in, 407
Steroids, in infant mice, dehydroepiandrosterone and testosterone, relative activities of, 131
influence of, on transaminase activity and integrity of thymocytes, 123
Submaxillary salivary gland, in the mouse, experimental analysis of, in relationship to its nerve-growth factor content, 915
Survival, levels of, in parathyroidectomized rats, 715

T

Tadpole, relation between action and degradation of thyroid hormones in, 622
Testosterone, activity of in infant mice, 131
-4-C^{14}, uptake and subcellular distribution of C^{14}-labeled steroid following administration of, 109
effect of, on nucleic acid and protein in the sex accessory glands of Long-Evans and Sprague-Dawley rats, 747

rats treated with, glucose-6-phosphatase activities, 842
Testosterone propionate, effect of, on incorporation of glycine-2-C^{14}, 175
interaction with norethandrolone on the prostate of mature rat, 929
Tetraiodothyropropionic acid, enhancement of yeast metabolism by, 333
Thiourea-S^{35}, the metabolism of, by the thyroid gland of the guinea pig, 540
3:5:3′ - Triiodothyropropionic acid, methyl ether, effects in rat, 365
3,3′,5′,-Triiodo-DL-thyronine, biological activity of, 79
Thymocytes, integrity of, influence of steroids on, 123
Thyroglobulin, effect of thyrotropin on the hydrolysis of, 603
Thyroid, effect of, hypophysectomy and growth hormone on the light cells of the, 786
TSH on accumulation of perchlorate and fluoroborate ions in, 295
hyperfunctioning, of mice, diiodotyrosine: monoiodotyrosine ratio in, 13
neural control of, 517
of the guinea pig, metabolism of thiourea-S^{35} by the, 540
role of, in the control of polyploid cell formation in rat liver, 761
stimulator, failure of TSH antisera to neutralize, 801
Thyroid function, effect of electrical stimulation of hypothalamus on, 298
Thyroid gland, human, protein-bound iodine in, autoradiographic time study of, 278
Thyroidal activity, *in vitro* stimulation of by propylthiouracil, 7
Thyrotropin, effect of, on the hydrolysis of thyroglobulin, 603
stimulation of alpha aminoisobutyric acid-C^{14} uptake in thyroid slices by, 937
Thyroxine, effect of, on oxygen consumption rate of liver homogenate, relation to ATP concentration, 68
upon strontium and calcium metabolism of embryonic bone growth *in vitro*, 774
electrophoresis of, in protein free solutions and in sera deficient in binding proteins, 679
estimation of secretion rate with radioiodine, new procedure, 142
excretion, in lactating rats, 75
in ovariectomized rats, 673
and related phenols, photoactivated, flavin-induced degradation of, 210
and the release of protein from rat liver mitochondria, 511
serum protein complexes in various animals, 686
synthesis of, by L-amino acid oxidase, 931
Tissues, metabolism of, from pregnant diabetic rats *in vitro*, 88
Transaminase activity, influence of steroids on, 123
Transamination, of halogenated aromatic amino acids, 750
Transmethylation, reaction, formation of 2-methoxyestradiol-17β in human steroid-producing tissues, by 943
Triiodothyronine, exophthalmos producing quality of, 864
Tryptophan pyrrolase induction, and influence of adrenocorticoids, 84
Tumors, mouse pituitary thyrotropic, diiodotyrosine: monoiodotyrosine ratio in hyperfunctioning thyroid, 13
2-Methoxyestradiol-17β, formation of, in human steroid-producing tissue, 943

U

Uterine glycogen, the insulin independence of, in the rat, 600
Uterus, postpartum involution of the, enzymic activity associated with, 567

V

Vasopressin, extraction of, use of percolation for, 43
Vitamin D_2, hypercalcemic and hyperphosphatemic actions of, 815

X

X-irradiation, of newborn rats, liver glycogen and blood sugar levels in, 595
whole body, nitrogen excretion and the adrenal gland, 589

Y

Yeast metabolism, enhancement of, by tetraiodothypropionic acid, 333
